

SnapShot™ ATP Device for 3M™ & Bio-Trace™ Luminometers

SnapShot is designed to help companies conducting ATP monitoring with a 3M™ or Bio-Trace™ luminometers reduce costs and achieve more accurate results. SnapShot works exactly the same as the test device it is replacing so there is no need to adjust Pass/Fail settings in the luminometer.

Benefits:

- Costs up to 50% less than Clean-Trace™ test devices
- Patented device design enables superior sample recovery
- Unique liquid-stable chemistry produces consistent results
- Sensitive to low levels of contamination
- More tolerant to temperature abuse and sanitizers
- SnapShot uses less materials and plastic than Clean-Trace™ devices
- 100% recyclable
- 15 month shelf life at refrigerated temperatures (2-8°C)
- 4 week shelf life at room temperature (21-25°C)

Performance:

- SnapShot devices offer greater sensitivity over Clean-Trace™ tests
- SnapShot's unique, patented design helps to lower test-to test variability in 3M™ or Bio-Trace™ instruments

SPXL-1333	SnapShot Universal ATP Detection Device for 3M™ and Bio-Trace™	100

Improved Test Gives Better Performance:

Clean-Trace™ test devices contains foil seals that must be punctured by the swab tip before collected sample can mix with the chemistry in the tube. By puncturing these seals with the swab tip, sample is left behind due to friction, and less samples makes it into the test device for activation. This gives an inaccurate reading, as the system detects less ATP than was present on the surface. SnapShot is designed so that 100% of sample collected is measured, leading to superior sample recovery and more accurate, repeatable results.

3M™ / Bio-Trace's™ Clean-Trace™

Hygiena's SnapShot™

Trade Up Program

Hygiena's trade-up program allows you to trade in a 3M™ or Bio-Trace™ luminometer for a brand new Hygiena luminometer. Our instruments are multi-platform, allowing you to collect, analyze, and report data from multiple quality indicators. Unlike other monitoring system manufacturers, there is no scheduled yearly maintenance and calibration necessary for the system. Hygiena's trade-up program can help you save up to 50% on testing costs and thousands of dollars per year.

Visit www.hygiena.com to learn more about Trade Up and see how much you could save!
